EXPERIENCE

General Assembly — *Full Stack Web Developer Graduate*

March - June 2016

A 60 hour per week program, learning and building Ruby/RoR and M.E.A.N. stack apps.

Peterson co — *Lead Power Generation Industrial Field Technician*

11 Year career 2004-2015

- Top of my class through a 3 year, 70 hr week training A.S. program
- Ended my career as the top engineer in the bay area
- Learned German on my own, to program cutting edge controls from Germany
- Developed many processes in the agile and six sigma environment that saved the company millions
- Increased client retention through empathy and negotiation
- Improved logistical processes on projects I led
- Demonstrated expertise in IoT for automation, controls and monitoring

WEB DEV PROJECTS

SF secrets — *M.E.A.N. stack, multi-external API app, -link*

Curiosity about life, adaptability and courage can reveal many secrets. Feel free to explore or sign up and share. Built from the ground up in 8 days in the MEAN stack.

@-Some-Point — *Ruby/RoR Team project, -link*

Inspired by google's APIs and logistics were motivation for several projects. Find your shortest route among several points. Being elected project manager on this app, I also built the Auth, the controllers and SQL DB. We built this Ruby/RoR app in 7 days.

ProBuilder — *M.E.A.N. stack, project tracker app, -link*

Better communication can increase production. Track your projects and tasks using my first full stack app. Currently being BETA tested by a company. Built in 5 days.

Self-Building Race — *Self-building Object Oriented race game*

Going above and beyond, this program builds its own player and board objects. Race each other by rapidly pressing your key.

EDUCATION

SJDC/SRJC — *several A.S. degrees in technical repair*

2003-2005

The 2nd highest (out of 2,200 participants) "CAT train test" score in the state of CA. Graduated top of my class (4.0 gpa on three degrees)
